SKILLS

Architecture Designing

NodeJS (ExpressJS, NestJS, Prisma)

JavaScript (Angular, React, TypeScript)

C# (.Net Core and Framework)

MongoDB, PostgreSQL, Redis

GraphQL (& Federated)

RabbitMQ, Kafka

AWS, Azure

HTML5 & CSS3

Python (FastAPI, Django)

Docker

Github CI/CD

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience building scalable products for **high-growth SaaS companies, including unicorn-scale organisations**. A **polyglot engineer** specialising in **JavaScript/TypeScript, C#, and Python**, with strong experience in **backend systems**, APIs, microservices, and cloud-based applications. Also experienced across **frontend and mobile development**, bringing a broad product perspective to reliable and maintainable software delivery.

EMPLOYMENT HISTORY

Software Engineer (BE heavy), Fresha Prishtina
Dec 2025 — Present

Working within a high-performing team of five engineers, delivering tax compliance and e-invoicing solutions for international markets.

The projects I have worked on:

TicketBAI Integration — Spain (Basque Country)

Built an end-to-end TicketBAI integration covering XML generation, API submissions, error handling, and retries to enable tax compliance in Spain's Basque Country.

NF525 Certification (France)

Designed and implemented an ECDSA P-256 transaction-signing engine and immutable event logging system to support compliance with French NF525 anti-VAT fraud requirements.

Tax Engine Optimization

Contributed to the optimization of a multi-jurisdiction tax calculation engine, improving support for complex tax rules and helping reduce operational costs.

Main technologies:

Elixir, Ruby, Node.js, NestJS, React, PostgreSQL, Redis, Kafka, gRPC, AWS, Terraform, Argo CD

AI-Powered Assistants: Claude, OpenCode, Copilot

Senior Software Engineer, Radix Prishtina
May 2024 — Dec 2025

Got promoted to Senior Software Engineer. What I did was:

- Led a team of 4 engineers
- Built a dependency-free JavaScript library used across front-end and back-end services, reducing maintenance overhead
- Played a key role in product and architecture decisions that shaped core development direction

LANGUAGES

Albanian

English

HOBBIES

Crossfit, Investing, Mathematics

- Improved feature performance by up to 90% through internal redesigns
- Optimized and scaled systems to handle higher load while lowering resource usage
- Mentored teammates in NodeJS, GraphQL, and Redis, strengthening overall team capability

Technologies:

Backend: Node.js, JavaScript/TypeScript, C# (.NET), Python, Go
Frontend: Angular
Databases: MongoDB, PostgreSQL
Messaging: RabbitMQ, Redis
Cloud Platforms: AWS, Azure
DevOps & Infrastructure: Terraform, Argo CD
Testing & Quality: Cypress, Playwright, Postman
Version Control: Git
AI & Developer Tools: Cursor

Software Engineer, Radix Prishtina
Nov 2021 — May 2024

- Turned requirements into technical designs and performance goals.
- Participated in architecture planning and decisions
- Designed, built, and updated software systems and custom components.
- Created new solutions by following performance standards, security practices, and design patterns.
- Wrote unit tests for UI, back-end, and database features.
- Helped build a new microservices architecture.
- Reviewed code and fixed bugs.

Tech Stack:

Angular, NodeJS, Federated GraphQL, MongoDB, PostgreSQL, Apache Parquet, Redis, CloudAMQP

Full Stack Developer, Inovativi Prishtina
Feb 2021 — Nov 2021

- Built full-stack web apps to process, analyze, and show data visually.
- Planned, wrote, and debugged web applications and software.
- Made sure products worked well across different platforms.
- Designed and developed RESTful services and APIs.

Front-end languages: HTML, CSS, Javascript (ES5+), Bootstrap 4
Back-end languages: ASP.Net Core, ASP.Net Core Web API
Databases: Microsoft SQL

Junior Full Stack Developer, Inovativi Prishtina
Sept 2018 — Sept 2020

- Built stable and maintainable code.
- Created new features and functionality for various eCommerce sites.
- Worked with the design team to suggest solutions for a user-friendly interface.
- Reviewed code and fixed bugs.
- Developed on-site content, meta descriptions, and page titles to support SEO.

Tech Stack:

Wordpress, HTML5, CSS3, Bootstrap 4, JavaScript, React.js, jQuery, PHP & MySQL, Laravel, ASP.NET Core

Architecture used:

MVC, MVVM, CQRS, Functional Programming

Student Ambassador, Universum College Prishtina
Oct 2019 — Jan 2020

Tutored a group of 30 freshmen and taught them the fundamentals of programming with Python 3

Co-Founder & Full Stack Developer, Bejdicka Prishtina
Dec 2017 — May 2019

- Building stable and maintainable codebase using HTML5, CSS3, JavaScript, PHP and MySQL
- Creating features, functionality and capabilities
- Bug fixes
- Maintenance and uploading the code to server

EDUCATION

Bachelor of Science, Antalya Bilim University Antalya
Oct 2020 — Jan 2021

Exchange program for a semester in partnership with Erasmus+ and Antalya Bilim University

Bachelor of Science, Universum College Prishtina
Oct 2018 — Jul 2021

High School Degree, High School of Maths Prishtina
Sept 2015 — May 2018
